

Delivering **a range of tailored livestock protection solutions** that help farm businesses mitigate the increasing threat of disease.

Step 1

Biosecurity Advisory Service

As a poultry or egg farmer, it is essential to take proactive measures in securing the health and safety of your birds.

With Livetec's Biosecurity Advisory Service, you can be confident that you are taking the necessary steps towards protecting your livestock from diseases and outbreaks.

Take the first step towards securing the future of your flock with the Livetec Biosecurity Advisory Service.

What's included?

1-day visit from a Livetec Biosecurity Advisor includes:

- **A review of your current measures**
- **A full farm walkthrough**
- **Findings and recommendations**
- **A review of on-farm processes**
- **Biosecurity performance rating**

Step 2

Contingency Planning

Contingency planning is a crucial part of poultry or egg farming. At Livetec we have developed Contingency Plans that cover every aspect of a farm business. Our plans highlight risks and emergencies that could arise in the future. Using this knowledge, we design strategies that help you to manage the impact of these risks and provide you with a clear roadmap of what to do, should you face any issues, including disease outbreaks and processing delays. Our Contingency Plans are also aligned with both the APHA disease outbreak measures and Defra's disease protocols.

With our Contingency Planning Package, our specialist advisors work with you to identify your relevant Standard Operating Procedures. These act as proof of active risk management and prevention, and are increasingly important for insurance purposes.

Our experts will tailor our support and advice to the specific needs of your farm business to include areas such as:

- ✓ Accessing the farm - by foot (staff/visitors)
- ✓ Accessing the farm - by vehicles (normal and heightened AI status)
- ✓ Diluting/mixing disinfectant for foot dips and dosing washers
- ✓ Feed deliveries
- ✓ Storage and collection of deadstock
- ✓ Muck/litter disposal, routine (multi-tier) and terminal
- ✓ Cleansing and disinfection of general area
- ✓ Accessing poultry buildings - intermediate area
- ✓ Egg collection
- ✓ Cleansing and disinfection of intermediate area, equipment etc.
- ✓ Accessing live bird areas
- ✓ Unloading hatching eggs/chicks/pullets into live bird areas (e.g. for broilers)
- ✓ Collection of floor eggs
- ✓ Removal of dead birds from sheds
- ✓ Management of catching teams
- ✓ Thinning broilers
- ✓ Terminal catching/depopulation
- ✓ Terminal cleaning
- ✓ Management of maintenance contractors
- ✓ Accessing the range area - by foot
- ✓ Accessing the range area - by vehicle
- ✓ Removing dead birds from the range area

What's included?

- **Biosecurity Plan**
- **Emergency Response Plan**
- **National Outbreak Plan**
- **Cleansing and Disinfection Plan**
- **Cost of Depopulation Report**

Biosecurity Plan

Without a Biosecurity Plan in place, you are leaving your business and animals highly susceptible to disease incursion. We document your Biosecurity Plans to encompass and outline all of the measures that must be followed by every single person on/off-farm to prevent the introduction of deadly pathogens. Our detailed plan provides in-depth information about current biosecurity practices on your farm.

What's included?

- **Comprehensive biosecurity overview to establish a robust line of protection**
- **Clear outline of defined biosecurity protocols**
- **All-year escalation planning and high-risk period prevention strategies**
- **Cleaning and disinfection records**
- **Assurance scheme mapping and compliance scheme breakdowns, including Lion Code and Red Tractor standards**
- **Effective pest incursion management plans**
- **Review of the latest government demands and critical information to ensure your plan is updated to standard.**

Livetec also provides disease requirement templates for site managers to complete, including the following:

- ✓ **Range Management Plans** which includes procedures for managing the range prior to a housing order being lifted
- ✓ **Contingency Plans** for the welfare of housed free-range birds
- ✓ **Wild Animal Control Plan**
- ✓ **Daily, weekly and monthly work schedules**
- ✓ **Maintenance schedules and inspections**
- ✓ **Standard Operating Procedures (SOPs)** covering all tasks that have an impact on farm biosecurity

Emergency Response Plan

Preparedness protects flocks.. Our Emergency Response Plan has been developed to improve your ability to react quickly and efficiently, should the worst happen. The ERP is a two-part plan that has been developed to enhance the preparedness of farming businesses in taking control, should an emergency arise..

What's included?

- **A comprehensive document outlining all emergency details within your premises and business**
- **Key contact listing and mapping of the surrounding area**
- **Immediate action plan on suspicion of disease or any other emergency**
- **An infected premises information form**
- **Record of up-to-date farm information**
- **Facility planning for visitors in the event of an emergency**
- **An infected premises map, showing animal health where to implement boundaries**
- **On-site storage and holding capacity planning**
- **Waste water containment and disposal schedules for birds**
- **Templates for bird numbers and housing**
- **A pest control plan**
- **Operational outline for depopulation should this be required**

National Outbreak Plan

Our National Outbreak Plan has been designed to simplify the regulations and requirements set by the UK government, providing bird owners with everything you need to know should you be impacted by a disease outbreak or fall within a restriction zone.

What's included?

- A how-to guide for disease declaration
- Information reporting when zones are implemented
- Explanation of movement restrictions
- Movement licensing and their conditions of use
- Zone definitions and their requirements
- How to deal with the media
- Farming related support services and mental health planning
- A guide on how to change or update your CPH number
- Updates of the Government's exotic diseases control and AI policy

Cleansing and Disinfection Plan

Our Cleansing and Disinfection Plan is designed to give you the framework for all of the measures you need to take, with clear instructions that comply with UK Government requirements. Having a plan in place saves you time, stress and money, allowing you to have peace of mind that you can become operational again promptly.

What's included?

- A structure to build a fully defined schedule of works for cleansing and disinfection
- A clear how-to guide for all necessary cleansing and disinfection works should be carried out
- Breakdown of the Regulatory Position Statement (RPS)
- An outline of best practice for cleaning farm equipment
- A plan on the use and disposal of water used in the cleansing process
- Exemplar schedules of work for cleansing and disinfection

Cost of Depopulation Report

For farmers seeking insurance coverage, it is crucial to understand the potential costs associated with a notifiable disease outbreak or any issue. Insurers typically require farmers to have comprehensive plans in place, which should incorporate the costs associated with depopulation. By incorporating these measures, farmers are demonstrating their commitment to proactive risk management including disease prevention, making them much more attractive to insurers.

What's included?

- Expenses related to the culling
- Costs of catching and disposal

Livetec biosecurity

Introducing the Livetec Systems App

Get ahead of bird flu with the Livetec Systems App. Our app caters to the needs of all bird owners - from poultry farmers to egg producers and backyard keepers.

It gives you real-time updates on avian influenza outbreaks across the UK, takes into consideration your proximity to your properties and informs you of the measures you need to take should you be caught in a zone.

Key Benefits

- Receive instant disease outbreak notifications with our Livetec Systems App
- Discover the power of disease outbreak monitoring with our interactive map
- Monitor wild bird cases of avian influenza in the wild birds map
- Access valuable data in our historical avian influenza outbreak timeline

Download the app for FREE today!
